Whether you're a weekend warrior or a world-class athlete, the mega dose of 36 grams of undenatured protein* in IsaLean Pro Shake takes your strength training and fitness goals to impressive new levels.

IsaLean® Pro Shakes help produce eye-popping results for athletes and anyone serious about athletic performance.

High-quality protein is the secret to kick-starting better performance and results. Protein is a known requirement for workout performance and recovery. Whey protein contains a high concentration of branched-chain amino acids and offers superior muscle and strength-building potential. Recent studies reveal significant benefits to strength and muscle gained from consuming whey protein immediately after a workout.

Formulated to provide a strategic balance of high-quality protein, healthy fats and energy-boosting carbohydrates — along with a broad performance spectrum of vitamins and minerals — IsaLean Pro is a nutritionally complete food fused with high-quality protein. So, when you're ready to get the most from your workouts and increase lean muscle, IsaLean Pro Shake will help take your workouts from average to awesome in no time!

IsaLean® Pro Shake, a convenient and delicious ultra-high protein meal replacement. Unleash the Pro in you!

Now available in three flavors:

- Natural Vanilla
- French Vanilla
- Natural Chocolate

- Build Lean Muscle
- Boost Fat Burning
- Gluten-Free
- Low Glycemic

* Per serving packet

** Isagenix sources the highest quality undenatured whey protein available from New Zealand grass-fed cows not treated with hormones or antibiotics.

The muscle-building and performance breakthrough the world has been waiting for.

Unlock the power of enriched whey protein with IsaLean® Pro Shake! This super-charged meal replacement helps you achieve better workout performance and recovery, burn fat and bust through stubborn weight-loss plateaus.

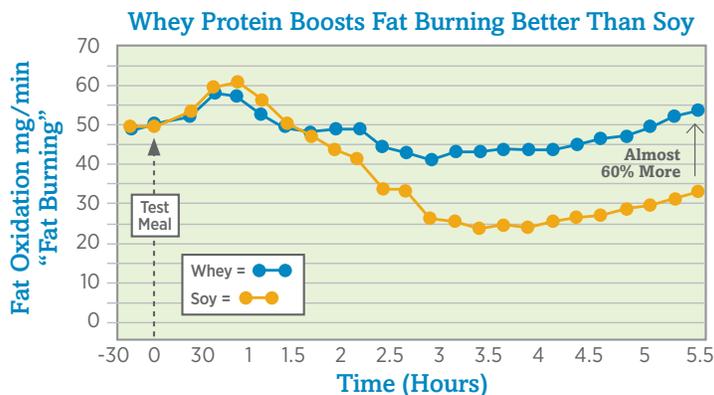

Whey protein contains a high concentration of branched-chain amino acids — such as leucine — that offers superior muscle and strength-building potential when combined with a regular exercise program. Recent studies show significant gains in muscle growth and strength from consuming high-quality protein immediately after a workout.

The whey to a healthier lifestyle. IsaLean Pro contains the highest quality whey protein concentrate and milk protein from small family farms in New Zealand, whose free-grazing, pasture-fed dairy cows are milked according to season and free from the harmful effects of hormones or antibiotics. New Zealand's standards far exceed the USDA organic standards so, as a result, IsaLean Pro contains significantly lower lactose levels and a superior amino acid profile.

Athlete benefits of whey protein:

- High concentration of branched-chain amino acids for increased muscle development
- Slows muscle breakdown
- Enhances satiety so you feel fuller, longer
- Boosts metabolism and fat burning
- Important antioxidants for battling oxidative stress

Shaking things up. IsaLean Pro Shake is a powerfully effective, high-protein meal replacement supercharged with complete nutrition. There are a number of meal replacement shakes out there, employing various ingredients such as soy. Research shows that whey protein is the superior choice for fat burning, muscle retention and growth that surpasses the results of soy-based shakes. Athletes who exercise intensely, regularly or sporadically, need increased amounts of protein for adequate muscle repair and growth.

Why IsaLean® Pro is the whey to go.

What Makes IsaLean Pro Shake Ideal? Studies show whey protein is a superior choice necessary for fat burning and muscle retention and growth. Athletes who exercise regularly or sporadically — with high intensity — need increased amounts of protein for adequate muscle repair and growth. As you build lean tissue with high-quality protein — aided by weight resistance exercise — you're able to burn even more calories.

IsaLean Pro can also be used to add quality calories and nutrition for those seeking to build significant muscle mass.

When should I take IsaLean Pro Shake? Protein and resistance exercise offers the best combined stimulus for muscle growth as we age. Keep your muscles stimulated over a 24-hour period and consume protein for breakfast (24g - 30g) along with additional protein intake throughout the day. IsaLean Pro Shake includes a superior amino acid profile that increases your protein intake to help curb hunger while increasing fat burning and muscle growth.

How will IsaLean Pro Shake give you better post-workout results?

If you exercise regularly and your workouts are long and/or intense, taking IsaLean Pro Shake after a workout will help your muscles repair themselves faster and increase strength. Any adult who wants maximum post-workout muscle gains should consider the significant advantages of incorporating whey protein into their routine.

How is IsaLean Pro Shake ideal for an active lifestyle? IsaLean Pro Shake's easy, single-serving packets are ready when you are, perfect for an on-the-go lifestyle. Just add purified water and a little ice and you have a high-protein infusion with all the nutrients, minerals and complex amino acids you need to bust through stubborn weight-loss plateaus and build fat-burning, lean, body-shaping muscle.
