# Results backed by science

Helping hundreds of thousands of people around the world, this Isagenix System is validated through multiple research studies conducted by independent and respected universities. The collective results reinforce what the before and after images show—this system works!

With multiple peer-reviewed publications in leading nutrition and health journals, this system is shown to be safe and effective for:

- Weight loss
- Overall and visceral body fat reduction
- Long-term weight management
- Better adherence to a monthly routine
- Lean muscle mass retention
- Gut health and GI function
- Improvements to cardiovascular health
- Favourable effects on the gut microbiome
- Increased toxin release from fat cells
- Enhancement of metabolic health indicators

**KEY FINDINGS** after 8 weeks of following the Isagenix System compared to a heart-healthy diet:

**64%**  
MORE WEIGHT LOSS

**71%**  
MORE FAT LOSS

**BETTER IMPROVEMENTS IN CARDIOVASCULAR HEALTH MARKERS**

**2×**

**AS MUCH VISCERAL (ABDOMINAL) FAT LOSS**

**SKIDMORE College found that individuals using the Isagenix System for a year:**

Continued to lose body fat and abdominal fat

Maintained improved cardiovascular health markers

Continued to increase lean body mass percentage

Maintained weight loss

\*Weight loss should not be considered typical. A study showed an average weight loss of 24 pounds after 12 weeks. Participants took part in a calorie-controlled regimen of Shake Days and one Cleanse Day per week. For more information on the study, see IsagenixHealth.net.

### Portion control

Choose the correct portion size for your evening meal—calories can be adjusted based on the outcome you're trying to achieve.

### Pick a lean protein

Providing your body with a quality source of protein at each meal will help you feel satisfied longer while supporting muscle growth and metabolism. Pick 4-6 ounces of your preferred lean protein like fish, chicken, eggs, beef, or your favorite plant-based protein. This should fill about a quarter of your plate.

### Fill up on the good stuff

Fill up on leafy greens (kale, spinach), complex carbs (brown rice, sweet potatoes, and fiber-filled veggies like broccoli, carrots, and onions), and heart-healthy fats (avocados, olive oil).

### Meal prep for success

It's easier to stick to a routine when your meals are planned out. Make your weekly shopping list to ensure you have the ingredients you need on hand. Planning meals in advance takes the stress out of trying to decide what's for dinner every night and will end the temptation for takeout when you're feeling tired at the end of a long day.

### Follow the Shake Day routine

Don't skip any meals, shakes, supplements, or snacks. Proper nutrition is key to achieving your goals.

## Shake Day tips for success

### 1. Upgrade your shakes

Shake things up! Try adding different fruits or nut butters to your IsaLean Protein Shakes for a delicious, nutrient-dense treat.

### 2. Let your body adapt

Your daily dose of stress-soothing adaptogens is essential! Try taking your Adaptogen Elixir or Ionix® Supreme at different times of the day to see what works best for you.

### 3. Focus on how you feel

Instead of staring at the scale, focus on how you look and feel. Do your clothes fit differently? Are you sleeping better? Are you feeling less bloated? Have grace with yourself as you build new habits.

### 4. Don't go hungry

Just because you're doing a reset doesn't mean you should stop listening to your body. Isagenix snacks or some extra protein like a handful of almonds can go a long way.

## Cleanse your body on a cellular level

About **12 hours** after your last meal, your body will begin to rely on stored nutrients. This means you'll start burning stored fat for energy.

At around **18 hours**, your body will start to increase its ability to stimulate lean muscle growth and release toxins that have long been trapped within your fat cells.

About **24 hours** after your last meal, your body will begin to experience increased autophagy. This is a natural process that replaces old cells with new, regenerated cells. This helps your body feel renewed, energised and reset.

## Customise your reset

Choose between one Cleanse Day per week or two consecutive Cleanse Days for two weeks out of the month, for a total of four Cleanse Days per month. Listen to your body to decide which one is right for you.

### One Cleanse Day Per Week

### Two Cleanse Days Per Week

## Cleanse Day tips for success

- 1. Use reminders**  
When creating a different lifestyle, it can be hard to incorporate every small, new detail. Using alarms or reminders throughout the day can help the system better fit into your day and keep you on track.
- 2. Keep moving**  
Modify your workout based on your energy level. Consider starting with light yoga, walking, or gentle stretching.
- 3. Stay hydrated**  
A reset flushes toxins out of your body. Water is the vehicle that helps get them out. Drinking a healthy amount of water, especially on a Cleanse Day, is essential.
- 4. Keep your energy up**  
If you need an extra boost, plain coffee or tea is perfectly fine to have during your reset.

Values are determined through a proprietary Isagenix System and are not linked to values in other food-scoring systems. While most healthy adults can consume up to 400 milligrams of caffeine per day, you should monitor your caffeine intake on Cleanse Days and consider your personal tolerance when choosing caffeinated snack options.

\*\*You should consult your physician or other healthcare professional before engaging in strenuous exercise on a Cleanse Day if your physician or healthcare provider advises against it. If you experience faintness, dizziness, pain or shortness of breath at any time while exercising you should stop immediately and seek appropriate medical care, if needed.
