**IsaGenesis®**

**WHAT**
A supplement designed to deliver telomere and antioxidant support.†

**WHY**
Our DNA is protected by telomeres. As we age, our telomeres can shorten faster than they should if we don’t take steps to protect them. Factors such as oxidative stress, an unhealthy diet, and lifestyle choices can contribute to the acceleration of telomere shortening, which can lead to more rapid aging.

**HOW**
IsaGenesis supports youthful cell function and healthy telomeres, and helps neutralize free radicals that can accelerate the aging process.†

---

**IsaOmega™**

**WHAT**
Pure omega-3 essential fatty acids to support heart, brain, and joint health.†

**WHY**
Our formula combines one of the most concentrated sources of DHA and EPA omega-3 essential fatty acids available. These fatty acids have been found to support cell function and heart, brain, and joint health.†

**HOW**
The fish oil is sourced from sustainable suppliers and goes through a molecular distilling process that creates a highly concentrated and pure oil.

---

**CytoActives™**

**WHAT**
Vitamin D, coenzyme Q10 (CoQ10), tocotrienols, and resveratrol to support youthful energy, cell function, and overall health.†

**WHY**
Over time, we gradually lose our ability to fully synthesize some nutrients that help restore our body’s vital systems.

**HOW**
CytoActives works to protect your body by using the latest bioactive ingredients to help support healthy aging and maintain physiological reserves and functions.†
Clinical Research & Findings on Healthy Aging

IsaGenesis®, when taken on a daily basis, can boost the concentration of a specific enzyme that is highly regarded as a biomarker of healthy aging.* Catalase, the enzyme linked to youthful aging, was found to increase its circulating levels within study participants.†

Key findings after 12 weeks:
